ACCELERATE YOUR IMPACT

Curiosity Incubator | Accelerator for Good

What if you could step outside of the daily grind and work through the core issues you face, with the enriched time and structured space to think about them differently?

And what if you could do this through together with the world's leading thinkers and doers, in a close-knit peer group and a multifaceted and accelerated environment, crafting solutions that really work?

Curiosity Incubator | Accelerator for Good is a solutions accelerator and living learning lab – a practical and intensive approach that takes you through the core steps, hand in hand with leading academics and practitioners from across the world, to craft solutions that will not just succeed but thrive in our challenging, fast-paced and complex environments – for Good

Curiosity Incubator | Accelerator for Good

Our go-to ways of solving problems and business as usual aren't working – we need a multi-faceted, accelerated approach to our accelerating challenges to create solutions that can scale.

Curiosity Incubator | Accelerator for Good is your one stop shop for turbo charging your work, impact, and success for 2026.

It's the only one of its kind in the world, bringing internationally-leading Accelerator framework incorporating:

- behavioural science
 - Applied systems change
 - public and for Good innovation methodologies
 - data, AI and foresight
 - Place-based learning and
 - hard-won government, third sector and entrepreneurial case studies and experience of what has worked in big solutions creation For Good
- into one accelerated format – working with the world's leading academics and practitioners on your challenges in real time.

- **Concentrating the best of Harvard, UCL and Cambridge experience** based on decades of building cutting-edge learning and applied public policy programmes and strategies for Good, into one 7-week hybrid accelerator.
- **Applied acceleration for impact** – Intensive weekly online sessions and a 2-day in-person workshop in Cambridge, UK, where we will collectively iterate, shape and elevate your solution with leading Cambridge academics and government and practitioner leaders, launching you with a fully-formed plan out of the Accelerator for a solution set up for success.
- **A year's worth of learning and acceleration on your solutions in 2 months** – designed for you to take back what you've collectively built directly into your role, network and projects: applying multi-faceted, full-spectrum approaches and tools to turbo charge your work and impact, making 2026 the year you take your work and purpose to the next level.

Curiosity Incubator | Accelerator for Good phases and modules

W/c March 16th 2026: 2x weekly online workshops (Incubating)

- For Good-focused innovation and solutions design: what are you trying to do and how? Plus:
- Behavioural science & applied psychology 1: how people work (leading Harvard/Cambridge expertise tailored for you)
- Behavioural science 2: why they do what they do

March 23-24th 2026 in-person workshop in Cambridge UK (Collective learning and iteration)

- Place-led approaches to solutions (municipal Places, organisational places, built environments) – with Cambridge City Council, Open Society Foundations experience, Cambridge University
- Deep dive into your problem questions and 2 days of co-creation with the cohort and experts to accelerate your solutions building
- Dinner on political psychology with Professor Simone Schnall, University of Cambridge

March 31-April 14: 4x online weekly Accelerate sessions to launch

- How to build cross-society scalable solutions for Good – with UK Govt, Brazilian Government, Barbados Govt, Australian public policy leadership
- Futures, foresight and data For Good – with European Commission and World Bank experts
- Frugal innovation/Frugal AI project, Cambridge University – does your solution need “AI” and if so, what and how? With Professor Jaideep Prabhu, Judge School
- Launching through the concrete wall – launching your solution and making it thrive

Previous participants' experience

"The Curiosity Incubator workshop was an awe-inspiring and transformative experience that surpassed all expectations... In the course of the workshop, I came to a profound realization about my own purpose and passion.

The challenges we discussed reaffirmed my commitment to making a difference in people's lives and governments. Guided by this clarity, I focused my efforts on developing the idea of a social impact centre, utilising behavioural lenses, human-centred and system change design, and technology to improve the public good in the global south."

Margarita Gomez, ED, Southern Voice & Founder, People in Government Lab, Oxford University

Previous participants' experience

From improving mental health treatments in the UK's National Health System (NHS) to increasing talent retention in the public sector, problems that initially sounded far from each other quickly transformed into a single network of connected statements.

And whenever we think about complex problems like climate change, energy affordability, universal healthcare, or gender inequality, the reality is that the chance of finding solutions to them without combining multi-disciplinary lenses is extremely low. But more important, rather than transferring the impossibility of finding a solution to external barriers, we had the opportunity to continuously think of what we could do to trigger the first quick win towards fixing these complex challenges.

Guilherme Castro, World Energy Council

Logistics, costs and application process

7 weeks weekly online sessions, March–April 2026

2-day in-person workshop at Jesus College,
Cambridge, March 23–24th 2026
